WORK EXPERIENCE

Software Developer

Stellar Blue - Thessaloniki, Greece

Hybrid

April 2024 – Present

- Maintenance and development of the company's systems front-end using the Vue Ecosystem.
- Apply Object-Oriented Programming principles with C# to build models and services for communication.
- Translate Excel files into functional code, maintain the existing code base, and refactor/fix arising issues.
- Collaborate seamlessly with team members using Agile Methodologies.

🔗 **JavaScript, Vue Ecosystem, Bootstrap, C#, Git, Swagger, Agile Methodologies**

Junior Software Developer

Contractuo - Venlo, Limburg, Netherlands

Remote

Aug 2023 – Feb 2024

- Maintenance and development of the company's document management system front-end using the Vue Ecosystem.
- Apply Object-Oriented Programming principles and leverage the Selection API in JavaScript to architect and construct an advanced application editor.
- Translate Figma designs into functional code, ensuring consistency and accuracy throughout the development lifecycle.
- Collaborate seamlessly with team members using Agile Methodologies, facilitating quick adaptation to changing project requirements.

🔗 **JavaScript, Vue Ecosystem, Tailwind, Git, Agile Methodologies**

EDUCATION

International Hellenic University

Master of Science, MS, Information Systems

Kavala, Greece

Sept 2022 – Present

TechPro Academy

Bootcamp, Back-end engineering Stream

Thessaloniki, Greece

Mar 2024 – Present

Democritus University of Thrace

Integrated Master, Forestry and Management of Environmental-Natural Resources

Orestiada, Greece

Oct 2014 – Jan 2021

PROJECTS

Time-series Visualization

Self-learning project

- Developed an interactive visualization tool for time-series data using JavaScript and Vue.
- Implemented responsive design with Tailwind, ensuring usability across different devices.
- Optimized performance for large datasets, providing smooth user experience.
- Integrated data fetching from APIs to dynamically update the visualization.

Weather Widget

Self-learning project

- Created a real-time weather widget using JavaScript and Vue, displaying current weather data.
- Styled the widget using Tailwind for a modern, clean user interface.
- Implemented API integration for fetching weather data from an external source.
- Ensured the widget is fully responsive and functional on various screen sizes.

Spaceflight News

Self-learning project

- Developed a web application to display the latest news in spaceflight using JavaScript and Vue.
- Utilized Tailwind to create a user-friendly and visually appealing interface.
- Integrated news API to fetch and display up-to-date articles.
- Implemented search and filter functionality to enhance user experience.
